

Ideation Phase

Define the Problem Statements

Date	31 January 2025
Team ID	SWTID-2026-9682
Project Name	AI-Augmented Backend Development – AI StudyBuddy API
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statements for AI StudyBuddy:

The statements below come from the challenges Rahul faces in the project's case study, and each one follows the five parts of the Miro template.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A second-year engineering student preparing for several semester exams and internships	Revise lengthy study material (lecture notes, PDFs, textbooks, articles) in the limited time I have	Preparing summaries and revision notes by hand takes a large part of my study time	My material is scattered across formats and nothing condenses it for me automatically	Overwhelmed and behind schedule
PS-2	A student with several exam dates approaching	Plan my revision around my available time and exam schedule	I cannot get a study plan that fits my subjects and free time	Planning is manual, and generic timetables ignore my exam dates	Stressed and unorganised

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-3	A student who wants to check my understanding before exams	Test myself on my own study material with flashcards and quizzes	Making flashcards and questions by hand is repetitive, and I switch between several apps	No single platform generates these resources and stores them securely for me	Frustrated and unproductive
